

Technical Specification | Acid Neutraliser

Acid Neutraliser

Part No: FP1021

ASPEN-11/08

Dimensions:

Diameter: 41.5mm \varnothing max
Length: 260mm
Contents weight: 150g
Total weight: 250g

Other Features:

- Compression fittings provide watertight seal and allow for easy replacement
- Inlet/outlet size: 22mm \varnothing
- Comes with 12 month replacement reminder sticker for boiler

Performance:

- Acid Neutralising for 12 months
- Max water flow: 1ltr/minute
- Max pressure: 2 bar (70psi)
- Max temp: 80°C

Service Guide:

Replace every 12 months.
Attach the reminder sticker to the boiler.

Condensing boilers produce acidic water that can harm the environment - using an Aspen Acid Neutraliser makes the water safe again.

- Typical fresh water is PH7 - boiler condensate can be as acidic as PH2.5
- Fits in line with the 22mm \varnothing condensate outlet pipe from domestic boilers
- Slim profile (41.5mm \varnothing)
- Active acid neutralising contents work for 1 year (reminder sticker for boiler included)
