

Technical Specification | Controls

Fan Speed Controller

Part No: Cooling FP2094 / Heating FP2095

ASPEN-5/09

Dimensions:

Height: 44mm
Width: 150mm
Depth: 75mm

Electrical Specification:

- Max 3 amp output
- Volts: 230V Hertz: 50-60 Hz
- Heat pump model: reversing valve input 24 to 240V A.C. opto isolated

Other Features:

- Available for cooling only
- Optional heat pump model
- Condenser temperature coil sensor
- Minimum speed setpoint 30 to 60°C

Controls head pressure to air conditioning and refrigeration systems by increasing and reducing fan speed with temperature on the condenser coil.

There is also a heat pump model for connection to the reversing valve.
